Objective IT repair specialist seeking career transition into software development.

Languages TypeScript, JavaScript, GoLang, Python, Java

Frameworks React, React Native, Node, Deno, MongoDB

Services AWS, Azure, Firebase, GitHub, Google Cloud Platform

Projects

Jan 2019 - Present: Freelance Software Development

- **Ambient Noise - React Native**, an audio touring application developed for Zillow.
 - Worked with clients to deliver a mobile app in an Agile development life cycle.
 - Integrated secure cloud hosting with Google Firebase.
 - **Inventory Tracker - React**, a web application for scalable inventory logging.
 - Converted project into TypeScript and Deno frameworks.
 - Cross trained other contributors in GitHub and React basics.
 - **Financier - React**, a fintech web application utilizing Plaid API.
 - Built by a small team in MongoDB / Express / React / Node.
 - Implemented a proprietary algorithm to calculate financial risk based on income.
 - **TGStation - DM**, a consistently top-20 rated GitHub repository and open-source game.
 - Learned industry coding practices & standards while working with professionals.
 - Contributed numerous refactors using the InfernoJS framework.
-

Certificates via Academind:

- Getting Started with Golang
 - Understanding TypeScript
 - React, NodeJS, Express, MongoDB - The MERN Fullstack Guide
 - Deno - The Complete Introduction
-
